

SNG Monitor

Our SNG Monitor gives you detailed insight into a sector that could have a major impact on China's gas market but that is largely unknown and misunderstood: China's coal-based synthetic natural gas (SNG) sector. The monitor delivers project-level analysis and discusses applied technology, environmental conditions, pricing and SNG project economics. With no precedence for SNG growth on this scale and limited foreign investment, this monitor is your trusted source to understand the real drivers, challenges and risks in China's SNG industry.

A unique look at this important sector with a risked supply forecast for coal-based synthetic natural gas

At a Glance

SNG Industry Update and Supply Outlook

Quarterly report covering progress in the SNG industry, challenges and a risked long-term supply forecast

SNG Project Database

Details on SNG projects in China (location, status, partners, capacity, coal source, monetization, technology, announced start date, risked start date, utilization)

SNG Pipeline Database

Details on SNG-associated pipelines (partners, status, gas source, allocated capacity, gas feedstock price, length, announced start date, risked start date, utilization)

Reliable Project and Infrastructure Maps

Clear and up-to-date maps of SNG projects and pipeline access

Responsive SIA Commentary

Timely and responsive commentary on industry events, policy and implications

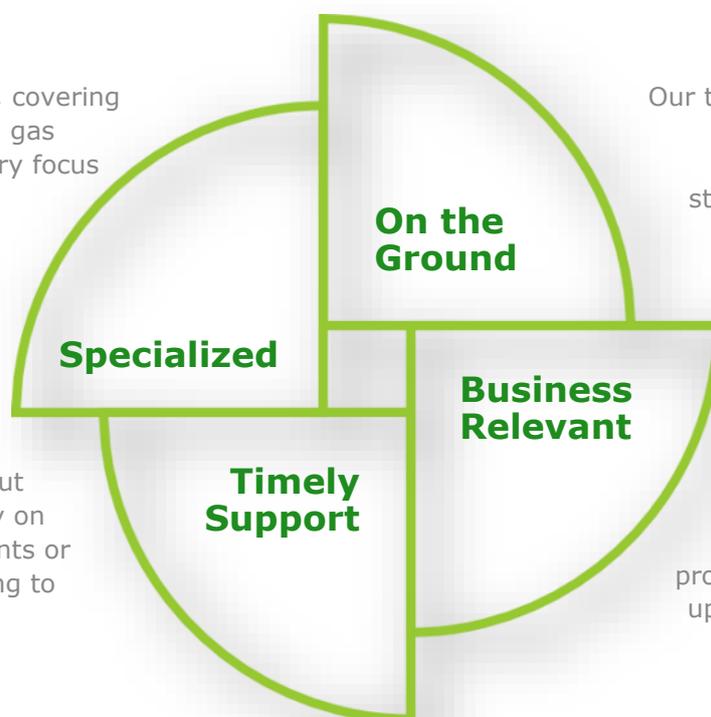

How the SNG Monitor can help you

- Monitor the status and challenges (technical, commercial, environmental) of SNG projects in China
- Understand China's SNG policy and how the government sees SNG in the overall supply mix
- Review how SNG is being commercialized and its price competitiveness against other gas sources
- Assess the impact of SNG on the gas balance and on other gas sources, including imports
- Compare and formulate internal views on SNG supply in China

Why SIA Energy

Founded in Beijing, covering the Chinese oil and gas sector is our primary focus

Our team interacts regularly with policy makers and industry players—state-owned and private, large and small, foreign and domestic

Whether sending out timely commentary on market developments or promptly responding to your inquiries, we understand time is important

In both our analysis and follow-up to client inquiries, we aim to provide you with the most up-to-date and business-relevant insights

About SIA Energy

Unparalleled insight — from China, for China

SIA Energy is a professional services firm providing insightful analysis on the Chinese energy market, policy and company strategies. We advise on the entire oil and gas value chain of activities for foreign firms looking to enter or grow in China and Chinese firms expanding abroad.

Active in the oil and gas industry, we interact daily with market players and policy makers. Our Beijing team of internationally-experienced professionals is dedicated to providing clients with local insight and perspective that is supported by trusted data and adds unique value to your business.
